Harry Pearson has prepared the following purchases ledger control account for the month of March 2014.

Purchases Ledger Control Account

Dr		Cr	
Details	£	Details	£
Bank	36 820	Balance b/d	38 220
Discount received	890	Purchases day book	52 940
Balance c/d	53 450		
	91 160		91 160
	91 160	Balance b/d	53 450

Harry has extracted a list of balances from the purchases ledger and found that they total £52 020. This does not agree with the balance on the control account. The following errors have been found.

- (1) A purchase invoice for £845 from a supplier had been recorded in the purchases day book but had not been posted to the supplier's purchases ledger account.
- (2) A cheque for £266 paid to a supplier had been returned unpaid by Harry's bank. The cheque was in full settlement of an invoice for £280. The returned cheque had been recorded in the supplier's purchases ledger account but had not been recorded in the control account.
- (3) A debit balance of £13 had been omitted from the list of purchases ledger balances.
- (4) A payment of £652 to a credit supplier had been entered in the supplier's purchases ledger account but had not been entered in the cash book.
- (5) A credit balance on a purchases ledger account had been overstated by £100.
- (6) A credit balance of £260 on a purchases ledger account had been offset against a debit balance on a sales ledger account. No entry had been made in either control account.
- (7) The balance of a supplier account outstanding of £66 was in dispute. Harry had written off the amount in the supplier's purchases ledger account. The write-off had not been recorded in the control account.
